8. Soils	☐	☐	☐
9. Revegetation	☐	☐	☐
10. Other	☐	☐	☐

Purpose of Inspection:
   Routine inspection while in the area.

Inspection Summary:
   Even though there was no one on site at the time of this inspection, there has been recent disturbance, and mining equipment was observed. This site is considered 'active'. Permit fees have been paid for the current year and the Division holds a reclamation surety. There has been some expansion to the west since the last inspection, however the site is still within the permitted boundary. The operator as done a good job in keeping trash and debris picked up and disposed of. There were no erosion problems noted, even though there has been recent heavy rains in the area.

Photos were taken to document site conditions.

Conclusions and Recommendations:
   This site appears to be in compliance at this time. It is recommended to continue to monitor this site when in the area.
